This is a basic economics literacy course for all concerned citizens who still have hope for a just society. This course explains, in specific unambiguous terms, how the USA and world economy really work, reveals the secret source of millionaire wealth, and explains the simple economic policy change (currently hidden from public consideration) that can effectively convert the ecologically unsustainable and increasingly unjust and exclusionary USA and world economy to one of sustainable, ecological, and equitable prosperity for all ... in the short term!

Preliminary Study of Economics is Not Required!

Those who graduate with a grade of 80% or more receive a valuable certificate and qualify for volunteer work with stipend and for free membership in the GCF international association!

We guarantee that this course will radically change the way you look at the world and your role in it!

\$1000 prize for any graduating student who can logically and substantially refute any major point in the course text!
